

## Software Developer / Analyst

Cambar Solutions is recruiting for a Software Developer / Analyst to be based at our corporate office in North Charleston, SC. For thirty years Cambar has been a leading provider of warehouse management software (WMS) to distributors in a variety of industries. The company has recently entered an exciting new market segment containing prospects with strong needs and unmet opportunities.

### Position Description

In the role of Software Developer / Analyst you will be responsible for software development of C /C++ Win32 GUI and object programs for base enhancements, client requested modifications, and issue resolution in our WMS application. As you gain experience, you will have the opportunity to participate in writing technical specifications, analysis and solution development for new business requirements and system functionality, and participate in creating future releases of our WMS application.

This position requires minimal travel. The opportunity for travel in the role of client and implementation support is available as experience is attained.

### Qualifications

The Software Developer / Analyst should have 2-5 years of experience in programming and technical design in C / C++ applications in a Win32, or equivalent GUI environment, and C# ASP.NET. He/she should have experience in most or all of the following development environments and tools: Visual Studios C++ 6.0, Visual Studios 2005, ASP.NET, Infragistics, SQL Server 2005, Oracle, DB2, Web Services, Data Adapters, Stored Procedures, and SQL Reporting Services.

The ideal candidate for this position will be a quick learner who is self sufficient, with strong problem solving and practical learning skills. He/she must be capable of understanding the application and its architecture, understanding the intent of new requirements or processes, and producing an appropriate solution within the programming standards of the application. He/she should be energetic, conscientious, and enthusiastic; someone who strives to exceed expectations.

Relevant industry experience is desired. The ideal candidate for this position will have working knowledge of best practice processes and procedures for Warehouse and Distribution operations.

### Education

A Bachelor's degree in Computer Science or Mathematics is strongly desired.

### Applications

Interested candidates should submit a detailed cover letter and resume with salary requirements via email only (No phone calls, please.) to:

[recruiting@cambarsolutions.com](mailto:recruiting@cambarsolutions.com)

Subject: Software Developer / Analyst Position

Qualified candidates can expect to be contacted within 5 business days of resume receipt. Local candidates preferred. There will be no relocation allocation for this position.
